PROFESSIONAL SUMMARY

Software Developer with 5+ years of experience in TOTVS Protheus, ADVPL/TL++ and SQL Server. Delivered production back-office routines and REST/SOAP integrations across Finance, Billing, Purchasing, Inventory and Accounting. Experienced in building internal tools and open-source projects with Node.js, TypeScript, Flutter and Astro.

CORE SKILLS

ERP	TOTVS Protheus (SIGAFIN, SIGAFAT, SIGACOM, SIGAEST, SIGACTB, APSDU)
Languages	ADVPL, TL++, SQL/T-SQL, JavaScript, TypeScript
Integration	REST, SOAP, JSON/XML, webhooks, authentication, logging, contingency
Data	SQL Server, query tuning, indexes, execution plans, DBAccess/Profiler
Web & tools	Angular, PO-UI, Astro, Node.js, Git/GitHub, Docker, Linux, Jobs & Schedules, MCP

EXPERIENCE

Junior Developer Analyst — COMM Jun 2024 – Present

- Develop and maintain ADVPL/TL++ back-office routines with ExecAuto and Entry Points across Finance, Billing, Purchasing, Inventory and Accounting.
- Build REST/SOAP integrations with marketplaces (Anymarket, Shopee, Magalu, Casas Bahia), gateways and partners, covering authentication, JSON/XML, logging and contingency.
- Automate operational batches, closings and asynchronous syncs with Protheus Jobs and Schedules.
- Diagnose data inconsistencies and tune SQL Server queries (TCSQLExec, ChangeQuery) for high-volume reconciliations.

IT Intern — COMM Nov 2023 – Jun 2024

- Supported Protheus users and incidents, tracking fixes and corporate routine stability.
- Monitored integrations, logs, e-commerce and NF-e; supported ADVPL routines and SQL queries.
- Promoted to Developer Analyst in 7 months.

ADVPL / Protheus Developer — Freelancer Apr 2021 – Nov 2023

- Delivered ADVPL/TReport and SQL Server reports for financial titles, bank movements and reconciliation (SIGAFIN).
- Developed routines, Entry Points and support screens in Protheus; resolved data inconsistencies and tuned high-volume queries.

SELECTED PROJECTS

NOVA HUB WEB — Private operations dashboard (Node.js, Express, WebSocket/PTY, Linux) with telemetry, in-browser SSH terminal and task orchestration; no public port. · github.com/limaduzz11/nova-hub

VANTA Reader — Local-first Flutter reader for EPUB/TXT/PDF and CBZ/CBR comics, with offline library, reading progress and public catalog; 216 automated tests. · github.com/limaduzz11/vanta-reader

NOVA CRM — Single-tenant commercial CRM prototype (Astro, PHP, SQLite, SQL Server) with Kanban pipeline and Protheus integration. · elptecnologia.com.br/labs/nova-crm

protheus-research — TypeScript MCP server indexing Protheus syntax, routines, tables and rules for AI-assisted technical research. · github.com/limaduzz11/protheus-research

OpenPantheon — Independent technology publication (Astro, Cloudflare, Go) with articles, search, RSS and editorial operations. · openpantheon.com.br

ELP Tecnologia — Corporate website for the consultancy (Astro, technical SEO and responsive design). · elptecnologia.com.br

EDUCATION

Technology Degree in Systems Analysis and Development 2023 – 2026

Centro Universitário FMU (FIAM-FAAM), São Paulo

Professional Development: ADVPL Programming (Udemy) · Algorithms and Programming Logic (Udemy)

LANGUAGES

Portuguese — Native · English — Technical reading (documentation and RFCs)
